

Please DO NOT implement any proposal that would LESSEN Indiana's Telephone Privacy law protections.

We have a great law and IT WORKS. We used to receive several calls every night and the biggest thing I can say about our evenings now is that they are finally PEACEFUL again. Before we were constantly interrupted by solicitors when we were trying to help our kids with homework, get them bathed and ready for bed, etc. It's like having someone knocking at your door every hour.

We don't want lower standards such as companies that we have done business with before calling and trying to sell us more products. If they have something to sell they can send it to us through the mail. Hey, once in a while government works--let's not mess up a good thing. Each state can certainly do the same thing as Indiana and we don't need national involvement. We LOVE our state law so PLEASE don't preempt it. Like the man says, "It it ain't broke, don't fix it." Thank you.
